

THOMAS GREENE

tommyboy.greene@gmail.com | Boca Raton, FL | [linkedin.com/in/thomasmgreene06](https://www.linkedin.com/in/thomasmgreene06)

Customer support leader who builds his own tooling — five years and four promotions at a metabolic health startup through its acquisition by Dexcom, including a self-taught Python RAG agent built for the support org.

CORE SKILLS

Strategy & Leadership: Operations Strategy, Process Optimization, Team Leadership & Development, Cross-Functional Collaboration

Systems & Automation: AI Agents / RAG Systems, Workflow Automation, CRM Platform Migrations, Knowledge Base Management

Technical & Analytics: Data Analysis & Performance Metrics, QA Framework Design, Product Feedback Pipelines

Tooling: Python, Kustomer, Zendesk, Intercom, Stripe, Metabase, Datadog, Slack, Notion

WORK EXPERIENCE

Nutrisense | Remote — Sep 2021 – Present

(acquisition by Dexcom announced 2026)

Customer Support Manager — Jan 2026 – Present

- Own operational strategy for a growing support org; redesigned end-to-end escalation and triage, substantially reducing median resolution time.
- Designed and built an internal Slack-based AI support agent in Python/Flask — hybrid vector + lexical retrieval, intent classification, multi-turn troubleshooting, and draft reply generation, scoped to a permissioned knowledge base. Built self-taught, outside of engineering.
- Restructured the support knowledge base into a retrieval-ready corpus with typed metadata, improving both agent search and AI retrieval accuracy.
- Partner with product and engineering to surface gaps, edge cases, and high-impact improvement opportunities from support signal.

Customer Support Supervisor — Jun 2024 – Jan 2026

- Managed team leads and a team of specialists; rebuilt onboarding to significantly accelerate agent time-to-productivity.
- Owned data mapping and operational cutover for a full platform migration from Zendesk and Intercom to Kustomer, minimizing data loss and holding daily customer metrics flat through the transition.
- Analyzed support trends, Metabase data, and escalations to inform the product roadmap and preempt volume spikes.

Customer Support Team Lead — Apr 2023 – Jun 2024

(Customer Support Specialist, Sep 2021 – Apr 2023 — maintained 90%+ CSAT across channels)

- Coached a team of specialists through daily QA feedback and targeted performance management, driving a marked lift in team CSAT.
- Served as primary escalation point for high-complexity technical and account issues.

Apple | Remote

Sr. Technical Support Advisor — 2020 – 2021

- Promoted from Tier 1 to Tier 2, expanding scope across complex hardware, software, and device configurations.
- Resolved high-volume inbound technical issues daily, translating complex diagnostics into clear customer-facing solutions while maintaining top-tier performance metrics.

EDUCATION

Art Institute of Tampa | B.F.A. in Game Art & Design — Tampa, FL
